thorntons-property.co.uk

Thorntons is a trading name of Thorntons Law LLP

Property address	2L 57 Rosebank Street Dundee DD3 6LZ
Seller(s)	Lesley Duncan
Completion date of property questionnaire	20-Oct-20

Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

Information to be given to prospective buyer(s)

1.	Length of ownership				
	How long have you owned the property? 16 years				
2.	Council tax				
	Which Council Tax band is your property in? (Please tick)				
	A B B C D E F G H				
3.	Parking				
	What are the arrangements for parking at your property? (Please tick all that apply)				
	• Garage				
	Allocated parking space				
	• Driveway				
	Shared parking				
	On street				
	Resident permit				
	Metered parking				
	Other (please specify):				
4.					
4.	Conservation area				
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	Yes No Don't know			
5.	Listed buildings				
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	Yes No			
6.	Alterations/additions/extensions				
a.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	Yes No			

	If you have answered yes, please describe below the changes which you have made:		
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work? If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking. If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:	Yes No	
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property? If you have answered yes, please answer the three questions below:	Yes No	
	(i) Were the replacements the same shape and type as the ones you replaced?	Yes No	
	(ii) Did this work involve any changes to the window or door openings?	Yes No	
			_
	(iii) Please describe the changes made to the windows doors, or approximate dates when the work was completed): Please give any guarantees which you received for this work to sestate agent.		
7.	approximate dates when the work was completed): Please give any guarantees which you received for this work to

(Note: a partial central heating system is one which does not heat all the main rooms of the property — the main living room, the bedroom(s), the hall and the bathroom). If you have answered yes or partial — what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas	your solicitor or Yes No	

	(ii) Do you have a maintenance contract for the central heating system?	Yes No	
	If you have answered yes, please give details of the company with which you have a maintenance contract:		
	(iii) When was your maintenance agreement last renewed? (Please provide the month and year).		
8.	Energy Performance Certificate		
	Does your property have an Energy Performance Certificate which is less than 10 years old?	Yes No	\boxtimes
9.	Issues that may have affected your property		
a.	Has there been any storm, flood, fire or other structural damage to your property while you have owned it?	Yes No	
	If you have answered yes, is the damage the subject of any outstanding insurance claim?	Yes No	
b.	Are you aware of the existence of asbestos in your property?		
	If you have answered yes, please give details:	Yes No	

10.	Services				
a. Ple supplie		e connected to your propert	y and give o	letails of the	
Service	ces				
Gas o	r liquid petroleum gas	N

Telepi	hone	Υ	Virgin/Sky		
Cable	TV or satellite	Υ	Virgin/Sky		
Broad	band	Y	Virgin/Sky		
b.	b. Is there a septic tank system at your property? If you have answered yes, please answer the two questions below: Yes No				
	(i) Do you have appropriate consents for the discharge from your septic tank?				
(ii) Do you have a maintenance contract for your septic tank? If you have answered yes, please give details of the company with which you have a maintenance contract:					
11.	Responsibilities for share	ed or common areas			
a.	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area? If you have answered yes, please give details:				
	you have allottorou you, prodoc give detaile.				
b.	b. Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas? If you have answered yes, please give details:				
C.	c. Has there been any major repair or replacement of any part of the roof during the time you have owned the property?				

d.	Do you have the right to walk over any of your neighbours' property — for example to put out your rubbish bin or to maintain your boundaries?	Yes No	
	If you have answered yes, please give details:		
e.	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?	Yes No	
	If you have answered yes, please give details:		
f.	As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privately-owned.)	Yes No	
	If you have answered yes, please give details:		
12.	Charges associated with your property		
a.	Is there a factor or property manager for your property?	Yes No	
	If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:	NO	
b.	Is there a common buildings insurance policy?	Yes	
	If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges?	No Don't know	
C.	Please give details of any other charges you have to pay on a regular upkeep of common areas or repair works, for example to a resident maintenance or stair fund.		r
13.	Specialist works		
a.	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	Yes No	
	If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property.		
	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?	Yes No	\boxtimes
b.	If you have answered yes, please give details:		

C.	If you have answered yes to 13(a) or (b), do you have any guarantees relating to this work? If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may be shown in the original estimate. Guarantees are held by:					
14.	Guarantees					
a.	Are there any guarantees or warranties for	r any of tl	he follow	ng:		
		No	Yes	Don't know	With title deeds	Lost
(i)	Electrical work	\boxtimes				
(ii)	Roofing	\boxtimes				
(iii)	Central heating	\boxtimes				
(iv)	National House Building Council (NHBC)	\boxtimes				
(v)	Damp course	\boxtimes				
(vi)	Any other work or installations? (for example, cavity wall insulation, underpinning, indemnity policy)					
b.	If you have answered 'yes' or 'with title de installations to which the guarantee(s) rela		ase give o	letails of	the work or	
C.	Are there any outstanding claims under ar listed above?	ny of the	guarante	es	Yes No	
	If you have answered yes, please give details:					
15.	Boundaries					
	So far as you are aware, has any boundary of your property been moved in the last 10 years? If you have answered yes, please give details:					
16.	Notices that affect your property					
	In the past three years have you ever red					
a.	advising that the owner of a neighbouring property has made a planning application?				Yes No	

b.	that affects your property in some other way?	Yes No			
c.	that requires you to do any maintenance, repairs or improvements to your property?	Yes No			
	If you have answered yes to any of a-c above, please give the notices to your solicitor or estate agent, including any notices which arrive at any time before the date of entry of the purchaser of your property.				

Declaration by the seller(s)/or other authorised body or person(s)

I/We confirm that the information in this form is true and correct to the best of my/our knowledge and belief.

Signature(s): Lesley Duncan

Energy Performance Certificate (EPC)

Dwellings

Scotland

2/1, 57 ROSEBANK STREET, DUNDEE, DD3 6LZ

Dwelling type:Mid-floor flatDate of assessment:16 October 2020Date of certificate:20 October 2020

Total floor area: 68 m²

Primary Energy Indicator: 464 kWh/m²/year

Reference number: 2810-7420-6109-0036-9296 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

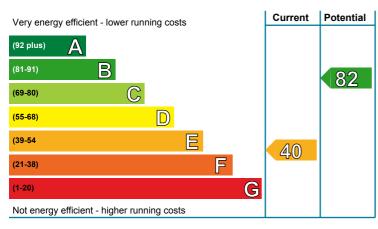

Main heating and fuel: Room heaters, electric

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£5,736	See your recommendations
Over 3 years you could save*	£4,062	report for more information

^{*} based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

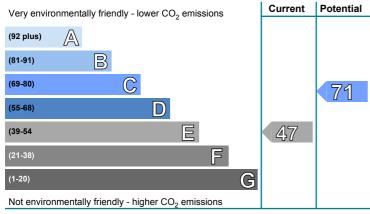

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band E (40)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (47)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Internal or external wall insulation	£4,000 - £14,000	£2364.00
2 Low energy lighting	£20	£48.00
3 High heat retention storage heaters	£1,200 - £1,800	£1443.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone or limestone, as built, no insulation (assumed)	***	***
	Sandstone or limestone, as built, partial insulation (assumed)	***	***
	Solid brick, as built, no insulation (assumed)	****	***
Roof	(another dwelling above)	_	_
Floor	(another dwelling below)	_	_
Windows	Fully double glazed	***	***
Main heating	Room heaters, electric	****	***
Main heating controls	Appliance thermostats	****	★★★★☆
Secondary heating	None	_	_
Hot water	Electric immersion, standard tariff	****	***
Lighting	Low energy lighting in 50% of fixed outlets	★★★★☆	★★★★ ☆

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 78 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 5.3 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 2.5 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£4,419 over 3 years	£933 over 3 years	
Hot water	£1,053 over 3 years	£546 over 3 years	You could
Lighting	£264 over 3 years	£195 over 3 years	save £4,062
	Totals £5,736	£1,674	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

December ded management		Indicative cost	Typical saving	Rating after improvement	
Re	commended measures	Indicative cost	per year	Energy	Environment
1	Internal or external wall insulation	£4,000 - £14,000	£788	D 64	D 68
2	Low energy lighting for all fixed outlets	£20	£16	D 65	C 69
3	High heat retention storage heaters and dual immersion cylinder	£1,200 - £1,800	£481	C 80	D 68
4	Replacement glazing units	£1,000 - £1,400	£68	B 82	C 71

Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

- Biomass boiler (Exempted Appliance if in Smoke Control Area)
- Air or ground source heat pump

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Internal or external wall insulation

Internal or external wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). It should be noted that a building warrant is required for the installation of external wall insulation. Planning permission may also be required and that building regulations apply to external insulation so it is best to check with your local authority on both issues.

2 Low energy lighting

Replacement of traditional light bulbs with energy saving bulbs will reduce lighting costs over the lifetime of the bulb, and they last many times longer than ordinary light bulbs. Low energy lamps and fittings are now commonplace and readily available. Information on energy efficiency lighting can be found from a wide range of organisations, including the Energy Saving Trust (http://www.energysavingtrust.org.uk/home-energy-efficiency/lighting).

3 High heat retention storage heaters

Modern storage heaters are less expensive to run than the direct acting, on-peak heating system in the property. A dual-rate electricity supply is required to provide the off-peak electricity that these heaters use; this is easily obtained by contacting the energy supplier. Ask for a quotation for high heat retention heaters with automatic charge and output controls. A dual-immersion cylinder, which can be installed at the same time, will provide cheaper hot water than the system currently installed. Installations should be in accordance with the national wiring standards. Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified electrical heating engineer. Ask the engineer to explain the options, which might also include switching to other forms of electric heating.

4 Replacement glazing units

Replacing existing double-glazed units with new high-performance units. Building regulations require that replacement glazing is to a standard no worse than previous; a building warrant is not required. Planning permission might be required for such work if a building is listed or within a conservation area so it is best to check with your local authority.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

You could receive Renewable Heat Incentive (RHI) payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat and, where appropriate, having your loft insulated and cavity walls filled. The estimated energy required for space and water heating will form the basis of the payments. For more information go to www.energysavingtrust.org.uk/scotland/rhi.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	7,875	N/A	N/A	(4,215)
Water heating (kWh per year)	1,876			

Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Email address: dundee@g-s.co.uk
Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

survey report on:

Property address	2/1 57 Rosebank Street Dundee DD3 6LZ
Customer	Miss Lesley S Duncan
Customer address	c/o Thorntons Whitehall House 33 Yeaman Shore Dundee DD1 4BJ
Prepared by	Graham + Sibbald
Date of inspection	10th November 2021

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report ² will be from information contained in the Report and the generic Mortgage Valuation Report.

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller:
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2. Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3. Category 1: No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	The subjects comprise a purpose built second floor flat forming part of a four-storey terraced tenement building containing seven residential units and a commercial premises at ground level (No. 55).	
Accommodation	Second Floor: Hallway, Lounge, Two Bedrooms, Kitchen, Bathroom with wc.	
Gross internal floor area (m²)	68	
Neighbourhood and location	The subjects form part of a mixed residential and commercial location a short distance north east of Dundee city centre. All amenities can be found within easy reach.	
Age	120 years approx.	
Weather	Dry.	
Chimney stacks	Visually inspected with the aid of binoculars where appropriate.	
	The chimney stacks are of solid stone construction although appear to have been capped. They are served with cement fillets. Only a very restricted view was possible from ground level.	
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate.	
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.	
	If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.	

	The roof is of pitched timber construction externally laid in slates. Only a very restricted view was possible from ground level due to the location of boundaries and neighbouring properties. Access to the roof space is via a hatch within the common stairwell. This was padlocked.	
Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.	
	The rainwater fittings are of cast iron and PVC design.	
Main walls	Visually inspected with the aid of binoculars where appropriate.	
	Foundations and concealed parts were not exposed or inspected.	
	The main walls are of solid stone construction, internally strapped and lined.	
Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.	
	Random windows were opened and closed where possible.	
	Doors and windows were not forced open.	
	The windows are of UPVC double glazed design.	
	Access to the property is via a timber entry door.	
External decorations	NOT APPLICABLE.	
Conservatories / porches	NOT APPLICABLE.	
Communal areas	Circulation areas visually inspected.	
	Access to all flats is via a common entrance and stairwell. There is a secure entry system although this was not tested.	
Garages and permanent outbuildings	NOT APPLICABLE.	
Outside areas and boundaries	Visually inspected.	
	The building abuts the pavement to the front. There is a common area of ground to the rear which is shared with the neighbouring blocks.	

Ceilings	Visually inspected from floor level.	
	The ceilings appear to be of lath and plaster/plasterboard design throughout.	
Internal walls	Visually inspected from floor level.	
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.	
	The internal walls appear to be of brick plastered on the hard, timber lath and plaster and timber stud overlaid in plasterboard.	
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.	
	Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.	
	Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.	
	Flooring within appears to be of suspended timber. Floors were covered.	
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.	
	Kitchen units were visually inspected excluding appliances.	
	The internal doors are of timber panel design.	
	The kitchen incorporates base and wall units.	
Chimney breasts and fireplaces	Visually inspected.	
	No testing of the flues or fittings was carried out.	
	All original fireplaces have been removed/blocked and we assume adequately vented.	
Internal decorations	Visually inspected.	
	The internal surfaces have a papered/painted finish and there are areas clad in tiling.	

Cellars	NOT APPLICABLE.	
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on. Mains supply. The consumer unit is located within the hall cupboard.	
Gas	NOT APPLICABLE.	
Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation. No tests whatsoever were carried out to the system or appliances. Mains supply. There is a sink unit in the kitchen and the plumbing	
	where viewed is of PVC and copper design. The bathroom incorporates a wc, wash hand basin and bath with electric shower over.	
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected. No tests whatsoever were carried out to the system or appliances. Space heating is by means of an electric panel system. Domestic hot water is provided by an electrical immersion heater and the associated hot water cylinder is located within the hall cupboard.	
Drainage	Drainage covers etc. were not lifted. Neither drains nor drainage systems were tested. Mains sewer connection.	
Fire, smoke and burglar alarms	Visually inspected. No tests whatsoever were carried out to the system or appliances. Smoke/heat detector noted.	

Any additional limits to inspection

For flats / maisonettes

Only the subject flat and internal communal areas giving access to the flat were inspected.

If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.

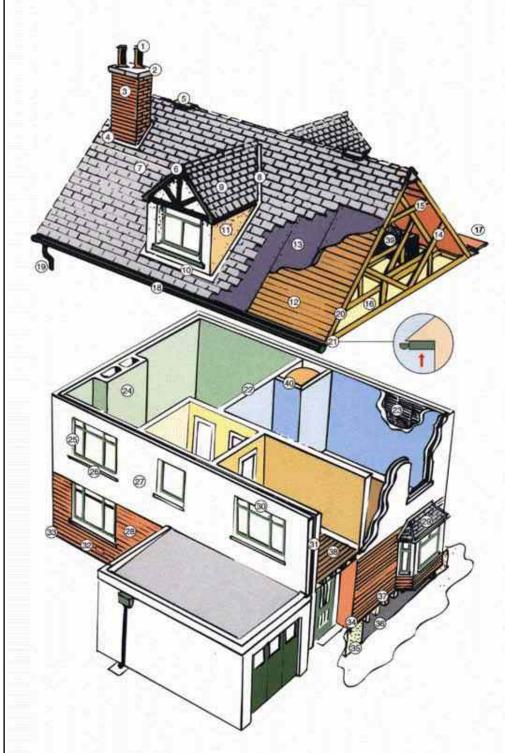

The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.

It is outwith the scope of this inspection to determine whether or not asbestos based products are present within the property. Asbestos was widely used in the building industry until around 1999, when it became a banned substance. If you have any concerns you should engage the services of a qualified asbestos surveyor.

No inspection for Japanese Knotweed was carried out and unless otherwise stated for the purpose of this report, it is assumed that there is no Japanese Knotweed within the boundaries of the property or neighbouring properties.

Only a very restricted view was possible of the roof covering and no access was gained to any roof timbers. Accordingly, no full comment can be made on the condition of the roof.

Sectional Diagram showing elements of a typical house

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	

Structural movement		
Repair category	1	
Notes	There is evidence of past structural movement having affecting the property observed in the form of a run in the flooring internally. On the basis of a single superficial inspection this appears to be longstanding and non-progressive.	

Dampness, rot and infestation		
Repair category	1	
Notes	There was no evidence found of significant dampness, rot or infestation within those areas of the property available for inspection. The communal stairwell has recently been inspected by a timber and damp specialist contractor and a copy of this report should be obtained, studied and authenticated prior to purchase.	

Chimney stacks	
Repair category	2
Notes	Scaling to stonework noted. No clear view was possible of the cement fillets from ground level although they do appear to be cracked.

Roofing including roof space		
Repair category	2	
Notes	Weathering was noted to the slatework. It should be appreciated that roof coverings of this type and age require regular and ongoing maintenance and an annual inspection is recommended. We understand that repairs have recently been carried out to the roof covering and a copy of all available documentation in this regard should be obtained prior to purchase.	

Rainwater fittings	
Repair category	2
Notes	Sections of the system appear choked. There is corrosion to the cast iron elements and there is a missing section of gutter to the rear. There is staining to the main walls suggesting leakages. Repairs are required to the system and should be implemented as soon as possible.

Main walls	
Repair category	2
Notes	There is climbing vegetation. Scaling of stonework was also noted. As mentioned above, there is staining to the main walls. No high damp meter readings were detected within the subject flat internally although this situation will require to be monitored and future repairs should be envisaged.

Windows, external doors and joinery	
Repair category	2
Notes	The windows are semi-modern although were found to function adequately where tested at random. Windows can be problematic and over time the operation of the windows can be affected and opening mechanisms damaged. It is therefore likely that maintenance/repair will be required as part of an ongoing maintenance programme.

External decorations	
Repair category	-
Notes	NOT APPLICABLE.

Conservatories/porches	
Repair category	-
Notes	NOT APPLICABLE.

Communal areas	
Repair category	2
Notes	Wear and tear was noted throughout the common stairwell.
	As per dampness, rot and infestation, we understand that the communal stairwell has recently been inspected by a timber and damp specialist contractor and all

Garages and permanent outbuildings	
Repair category	-
Notes	NOT APPLICABLE.

Outside areas and boundaries	
Repair category	2
Notes	Outside areas were found to be adequately maintained at the time of our inspection. They are however, bounded partially by older style stone rubble walls. Cracking and open joints were noted to these consistent with past movement. They will require to be monitored.

Ceilings	
Repair category	1
Notes	No significant defect apparent. Typical blemishes were noted consistent with older style lath and plaster ceilings.

Internal walls	
Repair category	1
Notes	No significant defect apparent. Typical blemishes were noted consistent with older style timber lath and plaster walls.

Floors including sub-floors	
Repair category	1
Notes	There is a run in the flooring as a result of past movement.

Internal joinery and kitchen fittings	
Repair category	1
Notes	We noted no evidence of significant defect to the internal joinery or kitchen fittings. There is distorted joinery as a result of past movement. The kitchen units are of a semi-modern style.

Chimney breasts and fireplaces	
Repair category	-
Notes	All original fireplaces have been removed/blocked and we assume adequately vented.

Internal decorations	
Repair category	1
Notes	The property is generally well presented. There are cracked tiles within the bathroom.

Cellars		
Repair category	-	
Notes	NOT APPLICABLE.	

Electricity	
Repair category	2
Notes	The electrical system is of a mixed age. There is a modern consumer unit and we understand that an Electrical Installation Condition Report has been prepared circa 4.5 years ago. A copy of this should be obtained. The Institution of Engineering and Technology recommends that inspections and testing are undertaken at least every ten years and on a change of ownership. It should be appreciated that only the most recently constructed or re-wired properties will have installations which fully comply with IET regulations.

Gas	
Repair category	-
Notes	NOT APPLICABLE.

Water, plumbing and bathroom fittings	
Repair category	1
Notes	The plumbing and fittings appear of copper/pvc piping where seen and appeared in serviceable condition but were not tested. The bathroom suite is dated although appears in serviceable condition from our visual inspection.

Heating and hot water	
Repair category	1
Notes	This is an electric heating system which was not tested.

Drainage	
Repair category	1
Notes	The property is thought to be connected to a main sewer. There was no surface evidence to suggest the system is choked or leaking.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	1
Chimney stacks	2

Heating and hot water	1
Drainage	1

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Second	
2. Are there three steps or fewer to a main entrance door of the property?	Yes No X	
3. Is there a lift to the main entrance door of the property?	Yes No X	
4. Are all door openings greater than 750mm?	Yes No X	
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No	
6. Is there a toilet on the same level as a bedroom?	Yes X No	
7. Are all rooms on the same level with no internal steps or stairs?	Yes X No	
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No	

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

We are unaware of any adverse planning proposals affecting the subjects although this should be confirmed by obtaining a Property Enquiry Certificate.

Absolute ownership assumed. We are unaware of any easements, servitudes or rights of way which may adversely affect the property. This point should be confirmed by reference to the Title Deeds.

It is recommended that when repairs, defects or maintenance items have been identified interested parties make appropriate enquiries in order to satisfy themselves of potential costs and the extent of the works required prior to submitting a legal offer to purchase.

Communal repairs are to be carried out to the roof prior to sale. A copy of all information in this regard should be obtained prior to purchase.

We noted no significant recent alterations.

Estimated reinstatement cost for insurance purposes

We are of the opinion that the subjects should be insured for buildings reinstatement purposes for a sum of not less than £185,000.

Valuation and market comments

We are of the opinion that the market value of the subjects all as previously described and on a vacant possession basis would be fairly stated in the region of £80,000 (EIGHTY THOUSAND POUNDS STERLING).

Our valuation reflects current market conditions relating to this area. We would assume that current trends will prevail at the ultimate date of disposal with no adverse or onerous matters being introduced into the market during the intervening period which would have a detrimental effect on price.
